SUMMARY

iOS developer, 4.5 years commercial in fintech, retail, and B2B SaaS. At DevTeamSpace I engineered an AI-powered iOS app (chat and task manager) from scratch. At 585zolotoy.ru I led a SwiftUI migration that lifted registration by 32% and purchase conversion by 6%. Also have fintech depth - shipped B2B payment features at Tinkoff, one of Europe's largest digital banks. I make architecture calls, work closely with product and backend, and hold crash-free rate above 99%.

SKILLS

- **iOS:** Swift, Objective-C, SwiftUI, UIKit, Combine / RxSwift, Swift Concurrency (async/await), GCD
- **Architecture:** MVVM, MVC, Clean Architecture, Multi-module
- **Testing:** XCTest, Swift Testing, Snapshot Testing, TDD
- **Networking & Data:** REST API, URLSession, Alamofire, WebSocket, SwiftData, CoreData, Firebase
- **Tools:** Xcode, Instruments, SPM, CocoaPods, Git, Fastlane, CI/CD, TestFlight, App Store Connect
- **AI Tools:** Claude, Cursor
- **Process:** Agile, Scrum, Kanban, SOLID, Code Review

EXPERIENCE

DevTeamSpace Inc. - pmtool.app | iOS Developer | USA, Portugal · Remote | May 2024 - Present

- Architected a B2B SaaS iOS app from scratch across **20 Swift packages in 4 layers** (Core, Infrastructure, UI, Features) using Clean Architecture and **MVVM**; co-led technical decisions as part of a **2-engineer team**.
- Owned the end-to-end development of core features including a **SwiftUI**-based design system, task tracker, and user profiles as one of two founding engineers.
- Engineered a custom **WebSocket protocol** for real-time cross-project chat built on a Swift Concurrency-native networking layer.
- Established a TDD culture by writing 140+ unit tests for critical business logic using Swift Testing, achieving a **99%+ crash-free user rate**.

585Zolotoy.ru | iOS Developer | Portugal · Remote | February 2023 - May 2024

- Led the migration of the user onboarding flow to SwiftUI, **resulting in a 32% increase** in registration completion and a 6% lift in first-purchase conversion.
- Spearheaded the incremental modernization of a large retail app, migrating 15+ critical screens from **UIKit to SwiftUI** and improving average screen load times.
- Developed a new SwiftUI component library from the ground up, which **accelerated feature development** for the entire team and standardized the user experience.
- Maintained and stabilized the **legacy Objective-C** codebase by adding XCTest coverage to critical user paths, preventing regressions during the migration.

Tinkoff Bank | iOS Developer | Russia · Hybrid | March 2022 - February 2023

- Shipped registration, QR POS setup, cart, and QR code payment features on schedule for a B2B payments app with **100K+ MAU**; maintained **crash-free rate above 99%** via UIKit components and XCTest coverage.
- Built reusable UIKit design system components adopted across the iOS team; maintained and extended them as the codebase grew.
- Implemented REST API integration with the payment gateway for PCI-compliant transaction flows.

Tinkoff Bank | Mobile system analyst | Russia · Hybrid | October 2020 - March 2022

- Designed security architecture for SoftPOS - an NFC payment terminal app in a PCI DSS environment; covered threat modelling, key management, and secure data flow.
- Led white-box encryption design to protect cryptographic keys from extraction even under full binary access.
- Designed REST API contracts for integration with core banking systems, ensuring encrypted transmission and audit-compliant data handling.

EDUCATION

Ural Federal University | Russia | 2010 - 2016

Master of Science - Nuclear Engineering - equivalent to Specialist Diploma, 5.5 years
